MySQL	1	2	3	4	

Project Summary

Random Encryption - Security (September 2018 – December 2018)

- Aim of the project is to send data securely to the end user by using Encryption algorithm.
- Encryption algorithm is completely designed by me. Core data structure used here is "Encrypted Circles".

Key Strokes – Security

- Aim of the project is to verify the user with biometric scanner and allow them to access their account.
- It contains a security layer of biometric scanner it filters the unauthorized user access and alert the user.

Website

- I was built my own website using HTML,CSS and JavaScript.
- The website just show up the details about me.

Secure door - Security (January 2019 - March 2019)

- Aim of the project is user view the person and have conversation with them who wait on doorstep of their home.
- It already desinged and named as (door ringbell) but our project just reduce the cost of the official project
